MEDIA STATEMENT - FOR IMMEDIATE RELEASE

Working together for mining and mineral exploration success

WINNIPEG, August 27, 2013 - The Mining Association of Manitoba Inc. (MAMI) supports the Manitoba government's commitment to bring together First Nation leaders, government officials and industry representatives. The group will discuss issues including engagement, employment and training, accommodation, procurement and resource revenue sharing.

"We welcome the opportunity to move forward with First Nation leaders and the Government of Manitoba on outstanding mining issues. Manitobans can benefit from mineral exploration and mine development," said Ed Huebert, executive vice president of the Mining Association of Manitoba Inc. "This is another step in making Manitoba a more desirable place for mining."

The Mining Association of Manitoba Inc. represents the Manitoba mining industry. Its members account for all of Manitoba's production of nickel, zinc, gold, copper, cesium and cobalt as well as the majority of mineral exploration in the province. Mining is Manitoba's second largest primary industry.

For further information, contact Ed Huebert at (204) 989-1890 or edhuebert@mines.ca.
